

**Backyard Players & Friends
Virtual Art Class #2**

Materials

- Paper of any kind (construction paper, wrapping paper, paper bags!)
- Scissors
- Tape

Matisse created *The Swimming Pool* in his dining room so that he could be reminded of his favorite place, even when he couldn't leave his house. What are places, people, or things are you missing right now? How can you use cut paper to represent them?

Consider what you want to show with your shapes

1. Cut shapes out of paper (you can do this yourself, or ask someone to precut shapes for you)
2. Arrange the shapes. You can combine smaller shapes to make bigger shapes
3. If you want, tape the shapes to a window or a wall to decorate your space
